

Tutorial -3

- 1) A coffee vending machine accepts 10-cent, 20-cent and 50-cent coins. Coffee is dispensed when any amount ≥ 50 cent is deposited. Represent this scenario as a DFA.

Provide the quintuple information for the above diagram

- 2) Draw a NFA to accept strings with at least TWO zeroes or at most TWO ones. $\Sigma = \{0,1\}$.
- 3) Draw a NFA to accept strings $(a+b)^*aba$. $\Sigma = \{a,b\}$.
- 4) Demonstrate the working with a NFA

```
a:
scanf ("%d", &n) ;
if (n>5)
    goto a
else
    printf ("Thanks") ;
```
